

Finishing Touch

Microdermabrasion scrub for polished skin

P R O D U C T F A C T S H E E T

packaging size (retail)	professional size	trial size	sample available	product pH level	product should last
48g jar	227g	NA	3ml tube	Skin-Neutral	2-3 months

Primary Benefits

Skin polishing scrub removes top, dead layer of cells to improve the texture of the skin. Great to use in between professional treatments to help maintain and enhance results. Enables moisturisers and other products to more effectively penetrate the skin.

Points of Difference

Contains Polynesian Volcanic Black Sand (Silica) and Ultra-Fine Pumice to remove dull, dry skin cells. Freshwater Silt helps to remove toxins while nourishing and hydrating the skin.

Who Benefits

Ideal for normal, combination, oily and mature skin types to help rejuvenate and brighten dull skin.

How to Use

Wet face. Using fingertips, apply a generous amount onto face, avoiding eye area. Gently massage in circular motions, moving outward. Rinse thoroughly and pat skin dry. Use weekly as part of your skincare regimen.

Ingredients

WATER (AQUA), COPERNICIA CERIFERA (CARNAUBA) WAX, C12-15 ALKYL BENZOATE, PUMICE, SILICA, BUTYROSPERMUM PARKII (SHEA BUTTER), GLYCERIN, CAPRYLIC/CAPRIC TRIGLYCERIDE, BEESWAX (CERA ALBA), SILT, CETEARYL ALCOHOL, DIMETHICONE, GLYCERYL STEARATE, PEG-100 STEARATE, STEARETH-20, CETYL ESTERS, PHENOXYETHANOL, POLYACRYLAMIDE, C13-14 ISOPARAFFIN, CHLORPHENESIN, XANTHAN GUM, DISODIUM EDTA, BUTYLENE GLYCOL, STEARETH-10, BENZOIC ACID, LAURETH-7, AMINOMETHYL PROPANOL, SORBIC ACID, FRAGRANCE (PARFUM).

Finishing Touch

Microdermabrasion scrub for polished skin

F R E Q U E N T L Y A S K E D Q U E S T I O N S

1 How does this product exfoliate the skin? Finishing Touch uses natural Polynesian Black Sand (Silica) and Ultra-Fine Pumice to remove dehydrated cells from the surface of the skin.

2 What are the exfoliants used in this product? Polynesian Black Sand (Silica) and Ultra-Fine Pumice exfoliate the dead surface cells from the skin. The surface of these exfoliants is smooth and round, which minimises micro-cuts and scrapes while effectively exfoliating the skin. These natural materials are high in trace minerals, which help to nourish the skin.

3 Why is it important to exfoliate the skin? It is important for you to exfoliate the skin because ageing causes the rate of cell renewal to slow down. Exfoliation removes dehydrated cells from the surface of the skin, smoothing it and enabling better penetration of other anti-ageing products.

4 I get microdermabrasion at my aesthetic clinic. Will this product enhance the effects? Finishing Touch will help maintain the skin's radiance and smoothness in between office treatments.

5 Scrubs can sometimes cause skin to feel dehydrated. Will this product cause dryness? Finishing Touch leaves a unique, moist, clean feel after rinse-off. It contains Shea Butter and Glycerin which help keep skin moist.

6 How often should I use this product? You should use Finishing Touch once or twice a week to maintain a radiant complexion. Because exfoliation makes the skin more sensitive to the sun, always use Intellishade® as your daily sun protection.

7 I have sensitive skin. Can I use this product? No. We do not recommend Finishing Touch for those with sensitive skin.
